Latest revision:

Net Info #34 is dealing with import of acoustic data in the library in general. Import into the 2D lib is not mentioned in the Net Info. Together with this Net Info 59 you will find a spreadsheet which makes it easier for you to create 2D records in the lib.

The import menu is found under File in the 2D lib. Browse to the spreadsheet. Make sure the number for start line (here 2) and stop line is correct and click Automatic link. This will automatically create links between the relevant columns in the spreadsheet and in the SoundPLAN lib because SoundPLAN will recognize the column headers used in the spreadsheet. Finally click Start Import.
